

RoboCrops

Overhaul Agriculture with robotics.

What is Robocrops?

- Established 2 major partnerships with Agritech Users.
- Raised \$50,000 USD from both partners for development
- 1 year development(2021)
- 1 year trial all-weather tested in Operation(2022)
- 1 year evaluation on real-life impact analysis. (2023)

AVG 10 Hectares per day vs 1.5 Manual
 16% reduction in chemical misuse Vs Manual
 1 motorcycle = 1 cuadrilla (group of 15, day laborers)

From Award-Winning Innovation to Leading Business Success:

- ▶ A 14.9 USD billion in 2022 Market needs:
 - ▶ Integration of other commercial agritech platforms
 - ▶ Hardware as a Service Model
 - ▶ Opensource modular integration
 - ▶ Collaboration Partnership to explore system expansion to other operations for year-round use
 - ▶ Exploration on integration of other fields and crops
- ▶ To meet these needs and elevate our \$2,000 USD /month per Robot HaaS service, we require:
 - ▶ **\$500,000 Investment**
 - ▶ Securing of a **Utility Patent** to safeguard our intellectual property.
 - ▶ Expansion to develop an integrates platform marketplace to ease adoption and reduce fragmentation to meet scalability demands.
 - ▶ **Expanded support and development** operations for continuous improvement.
