Overhaul Agriculture
with robotics.

A 5000 hectares 1,000-person labor short \$25M problem. Into \$1.8M Opportunity

1 year \$25K paid development(2021), 1 year trial(2022),
1 year all-weather tested in Operation(2023)

AVG 10 Hectares per day vs 1.5 Manual
16% reduction in rodenticide misuse Vs Manual
1 motorcycle = 1 cuadrilla (group of 15, day laborers)

From Award-Winning Innovation to Leading Business Success: Join Us on the Journey to Transform Agriculture

- ▶ Client needs:
 - ▶ 60 units 1st year
 - ▶ Hardware as a Service Model.
 - ▶ \$2,500 monthly per unit.
 - ▶ Collaboration Partnership to explore system expansion to other operations for year-round use.
 - ▶ one-year territory exclusivity in Guatemala

- ▶ To meet these needs and elevate our service, we require:

- ▶ \$350,000 Investment
 - ▶ Securing of a Utility Patent to safeguard our intellectual property.
 - ▶ Expansion to 70-unit fabrication to meet demands.
 - ▶ Expanded support and development operations for continuous improvement.

Furthermore, we are seeking an investor partner who not only believes in the power of innovation but also has the capability and network to extend our reach. An ideal partner would be one with the expertise and connections to help us explore new client bases in burgeoning markets like the Dominican Republic, Mexico, Colombia, and Brazil.
